

Reef manta (*Mobula alfredi*) model

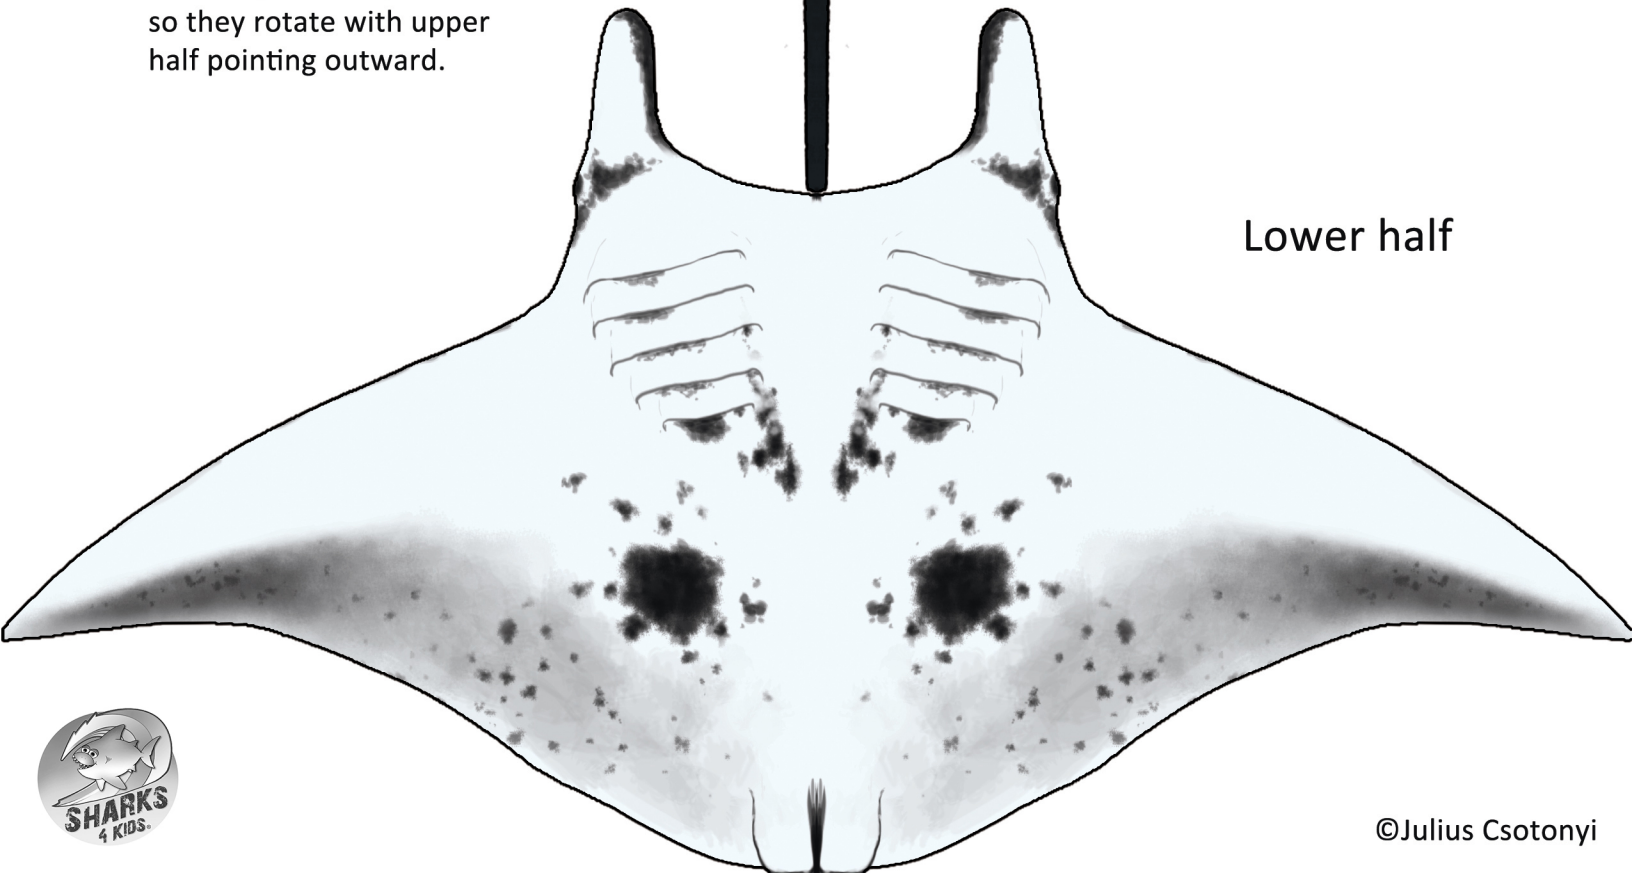

designed by
Julius Csotonyi

Upper half

INSTRUCTIONS

1. Fold paper along center.
2. Cut out upper and lower halves.
3. Cut outer margins of pelvic fins (the little fins at the back of lower half) and bend them down slightly.
4. Spread glue on inner sides of wings (pectoral fins) and cephalic lobes (feeding tentacles).
5. Press halves together along glue.
6. Spread mouth open a bit and hold open with a coin while glue dries.
7. Carefully bend cephalic lobes so they rotate with upper half pointing outward.

Lower half
