

SHARK FACTS

EPAULETTE SHARK

EPAULETTE SHARK (Hemiscyllium Henryi)

- ▶ They are found in shallow reef and tide pool habitats
- ▶ Can reach a length of 70 cm (28 in)
- ▶ They feed on worms and crabs
- ▶ They are more active at night (nocturnal)

DID YOU KNOW?

Epaulette sharks can "walk" on the bottom of the reef or move from a tide pool back into the ocean using their pectoral and pelvic fins!
